

SOURAV GHOSH

Full-Stack PMM · B2B SaaS · GTM, Enablement & AI-Powered Growth
souravghosh10001.github.io · +91 9663190619 · souravghosh10001@gmail.com

10+ years across B2B SaaS and enterprise GTM. I find where the revenue motion is breaking, fix the root cause, and build the system that keeps it from breaking again. That means positioning, pricing, launch strategy, sales enablement, and the AI-powered infrastructure underneath all of it. Across PropTech SaaS, GTM data platforms, enterprise IT services, and growth-stage e-commerce. I work closest to sales, closest to the customer, and I ship things reps actually use.

EXPERIENCE

Product Marketing Manager | SalesIntel, USA (Remote) (Dec 2025 – Mar 2026)

B2B SaaS, GTM data and agentic pipeline generation platform

- **Platform Repositioning:** Contributed to a strategic repositioning from data vendor to agentic pipeline generation platform. Developed positioning statements and supported messaging architecture across internal and external stakeholders.
- **Tier-1 Feature Launches:** Owned PMM deliverables for major product launches: ICP Intel, Firmographics, Technographics, JobsIntel, GTM Canvas (Agentic Automation), and core platform features. Produced positioning, slide decks, one-pagers, landing pages, and launch videos for each.
- **Competitive Intelligence:** Ran structured competitive research across ZoomInfo, Lusha, Apollo, Clay, and adjacent tools to sharpen ICP-level positioning. Built AI-powered competitive intel workflows (scrape, structure, analyse, present) that delivered a weekly Monday digest tracking pricing, positioning, and messaging shifts across 5 known competitors.
- **Win/Loss and Buyer Insights:** Synthesised win/loss data across Gong, Kaia, Outreach, and Salesforce to surface recurring objection patterns and competitive displacement themes. Outputs fed directly into sales messaging and battle card updates.
- **Sales Enablement and Training:** Produced and maintained SalesIntel Academy video modules for platform training across users and SDRs. Built a queryable product knowledge repository using NotebookLM, enabling reps to get instant, contextual product answers without waiting on PMM.
- **Outbound and Lifecycle Messaging:** Drafted email sequences, in-app notifications, and outbound messaging for Tier-2 feature launches to support SDR activation and user adoption.

Senior Product Marketing Manager | Planet Smart City, Pune (Apr 2021 – Dec 2025)

B2B PropTech SaaS, headquartered in Italy

- **GTM Strategy and Tier-1 Launches:** Launched the platform in Pune with zero market presence. Generated 500 MQLs in 3 months at 1,200 INR CPL, 50% below industry benchmark. Built landing pages, implemented full-funnel tracking, ran continuous A/B tests on messaging and creative. That pipeline became the blueprint for 4 additional metro expansions.
- **PLG Motion:** Replaced demo-led selling with a live trial model giving buying committees 15-day access to their own property data. Drove 400+ trials in 6 months. Conversion rate jumped from 10% to 40%.
- **Sales Enablement:** Built the enablement stack from zero: AI-powered battle cards, interactive demos injected into SDR sequences via n8n, and a NotebookLM product wiki for reps. Cut enterprise sales cycle from 90 to 45 days. 85%+ rep adoption in 60 days.
- **Positioning, Messaging, and Demand Gen:** Built positioning from scratch with no existing category. Separate tracks for facility managers (convenience) and decision-makers (cost savings). Contributed 20% of inbound pipeline in 18 months, 50% lower CAC, 35% better message-to-meeting rate.
- **Pricing and GTM Redesign:** Shifted pricing from hardware-component to apartment-based SaaS. Changed the motion from push to consulting. Delivered 5x lead-to-customer conversion and 0% paid churn in year one.
- **CRM, Competitive Intel, and Revenue Systems:** Built Zoho CRM infrastructure from scratch: lead scoring, pipeline workflows, and automation across Sales, Product, and Marketing. Ran a win/loss program through Gong and NotebookLM. Competitor intel hub cut sales prep time by 50% across a 12-person team.
- **Case Studies:** [PLG and Conversion](#) | [Enterprise GTM](#)

Paid Media and Growth Consultant | *Independent, Mumbai (Aug 2020 – Mar 2021)*

GTM and paid media consulting for e-commerce brands across USA, UK, and Australia

- **GTM and Paid Campaigns:** Media planning and creative strategy across Facebook, Google, and LinkedIn for 7+ clients in 3 markets. Built audience-to-message frameworks to tighten targeting and improve ROAS.
- **Marketing Infrastructure:** Automated lead qualification and scoring via Zapier into client CRMs. Configured GTM and Google Analytics for full-funnel attribution across client properties.

Marketing Manager | *Zee Entertainment Enterprises (ZEE5), Mumbai (Dec 2019 – Jul 2020)*

OTT platform · Multi-language content portfolio across India

- **Multi-Market Messaging and Launches:** Managed launch campaigns for ZEE5 AVOD across 3 language markets. Audience-segmented messaging for content launches and feature rollouts drove 15%+ average engagement lifts across social.
- **Campaign Strategy and Growth:** Led a Mother's Day influencer campaign on a \$30K budget across Instagram and YouTube. Delivered 30M+ impressions and 27,500+ new signups in Tier 1 and 2 cities. Owned the full campaign from brief to reporting.

Account-Based Marketing Executive | *Infosys Limited, Bengaluru (Jul 2016 – Aug 2019)*

Enterprise B2B IT services · Largest IT services exporter in India

- **ABM and Demand Generation:** Designed and ran ABM programs for Infosys enterprise service lines. Paid campaigns on LinkedIn, Google, and Facebook targeting CFOs, CTOs, and procurement decision-makers across global accounts. Pipeline tracked in Salesforce.
- **Sales Enablement and Content:** Built cross-channel content strategies and sales enablement assets for enterprise service lines. Supported SDR outreach with context-specific collateral.
- **Marketing Automation:** Managed the full stack: Salesforce Marketing Cloud, Oracle Eloqua, and custom lead workflows. Built lead scoring, tagging, and nurture sequences. Boosted email engagement 15% through behavioural segmentation and send-time optimisation.

EDUCATION

MBA in Marketing · Prin. L.N. Welingkar Institute of Management and Research, Full Time (2014 – 2016)
